universal solution for packaging

ZUMET MATIC X

Automatic self-dimensioning carton sealer with gummed tape for top and bottom sealing of boxes.

The machine model is ideal to seal cartons, with different dimensions in length, width and height which are randomly fed into the taping machine. The taping head and the two side belts adjust automatically to each box size. The boxes are fed by lateral conveyor belts, driven by a single motor thus optimizing even sliding of the boxes and ensuring perfect alignment of the upper and lower flaps which in turn guarantees perfect sealing. These models can be used by non-specialist staff and, if combined with infeed and outfeed conveyors, represents a simple, effective and economical packing station.
