TAPING

Paper tape is the environmentally friendly solution for closing boxes. The packaging box can be recycled in its entirety after use, including the adhesive tape. Due to the direct and strong adhesion, paper tape is also suitable for heavy packaging. Another great advantage of paper tape is that it cannot be removed without damaging the box, which has a preventive effect against theft. Paper tape can be divided into two types: self-adhesive tape and gummed tape. Gummed tape only sticks after the adhesive layer is activated by water. A dispenser is therefore always required for application.

Dispenser

The paper tape dispenser Lapomagic is an electric paper tape dispenser for gummed paper tape. The device detects the package dimensions and automatically issues the correct tape length. The device is suitable for faster processing of packages and less waste of tape due to accurate length determination. The Lapomagic is ideally suited for closing large volumes of varying dimensions.

Advantages

- Suitable for paper tape
- Automatic detection of packaging dimensions
- For large numbers of packaging
- Automatic power cut-off after 30 minutes without use
- Delivery speed 55 meters / min.

Technical data:	
Speed	55 mtr / min
Dimensions (L x W x D)	450 x 290 x 250 mm
Consumable	Every type of gummed paper tape
Roll width	Max. 200 mm
Outer roll diameter	Max. 200 mm
Water reservoir	1300 cc
Water temperature	Adjustable (50° - 75° - 100°)
Power supply	230 V / 50 Hz / 1 phase
	Cut-off after 30 minutes
Weight	12 kg
Noise	70 dB
